

## **Model A Era Slippers**

**By Daniel Green**

The *MAFCA Fashion Guidelines* include slippers in the "Footgear" sections. It is a good resource for men's, women's, and children's Model A era fashions. The only downside is they are only in black and white.

The following pages are advertisements from vintage magazines I found on the internet. Daniel Green was a common manufacturer of slippers during the years of our Model A's. Included are several pages in color.

Whether you call them slippers, lounging shoes, house slippers, hostess slippers or bedroom slippers the variety that Daniel Green created was many.

The following pages are great examples of the wide variety of slippers in a rainbow of colors. Enjoy!

The text may not be readable on some of the pages so here are some of the descriptions I could make out. Materials used were satin, crepe 'de chine, kid, patten leather, leather, brocade, fur, ostrich feathers and cosey felt!

Some of the styles mentioned are pajama boot, mules, D' Orsay, lounging, for bridge time and outdoor lounging.

The term "slippers" has a very broad meaning. Most of them were not your momma's slippers!
